

SVIATOSLAV ZVONYK

Frontend Engineer

sviatoslav.frontend@gmail.com | github.com/SviatoslavZv | t.me/sviatoslav_frontend | sviatoslav-portfolio.vercel.app

SUMMARY

Frontend Engineer who ships production-ready products — independently from architecture to deployment, with code written for a team to pick up. Live products in production: a Next.js + Supabase affiliate coupon platform, a headless-CMS learning-path aggregator, and an interactive supplement-stack builder.

PROJECTS

CouponCreek — couponcreek.com | github.com/SviatoslavZv/coupon-stream-app

Fashion/apparel coupon aggregator monetized through CJ Affiliate and Rakuten Advertising

- Built with Next.js (App Router, Turbopack), React 19, and TypeScript on Tailwind CSS v4
- Supabase (Postgres) backend with Server Actions for CRUD and Row Level Security
- Affiliate-link architecture: store-level fallback plus optional coupon-level link with redirect priority
- Automated content lifecycle: expired coupons are removed after 60 days via a pg_cron job
- SEO infrastructure: dynamic metadata, JSON-LD (BreadcrumbList, Organization, CollectionPage, FAQPage), sitemap with real lastModified timestamps, per-page OG images
- 100% accessibility score on Lighthouse across all audited pages

SkillTrack — skilltrack-dev.vercel.app | github.com/SviatoslavZv/skilltrack-app

Free curated learning-path aggregator for web development: 12 tracks, 50 hand-picked lessons, ~101 hours, no sign-up

- Built with Next.js 16 (App Router), React 19, and TypeScript on Tailwind CSS v4; content managed in Storyblok (headless CMS) behind a single typed data layer
- Static generation with ISR and an HMAC-verified revalidation webhook: instant navigation, edits go live without a redeploy
- Lighthouse 100 on desktop and 97 on mobile (lab data), 100 accessibility; per-page SEO metadata, Open Graph images, and sitemap, verified in Google Search Console
- Progress saved in the browser (Zustand + localStorage), hydration-safe; mobile menu with ARIA and keyboard support

BioStack — mybiostack.vercel.app | github.com/SviatoslavZv/biostack-app

Free interactive supplement-stack builder with cost/duration calculation and iHerb affiliate cart generation

- Built with Next.js 16 (App Router, Turbopack) and TypeScript on Tailwind CSS v4
- Custom SmartAlerts system flags ingredient incompatibilities and synergies based on a subType field
- EfficiencyAudit module scores overall stack effectiveness with a tiered penalty system
- Fully responsive architecture: sticky sidebar on desktop, three-tab bottom navigation on mobile
- Unified sharing system — native Web Share API on mobile, custom popover on desktop
- Catalog of 190+ products across 10 ready-made presets by category
- SSR/SSG for SEO intentionally deferred until traffic growth justifies it — a prioritization decision, not an oversight

SKILLS

Frontend: Next.js (App Router), React 19, TypeScript (strict), Tailwind CSS v4, shadcn/ui, Zustand, Lucide React

Data & Backend: Supabase (Postgres, RLS, Server Actions), pg_cron, Storyblok (headless CMS), ISR + webhooks

Analytics & SEO: GA4, Microsoft Clarity, Vercel Analytics & Speed Insights, JSON-LD, dynamic sitemaps, OG images

Deployment & Tooling: Vercel (CI/CD, Analytics), Git/GitHub, ESLint, ARIA-conscious accessible UI

EDUCATION

Kirovograd Engineering College — Associate's Degree, Mechanical Engineering & CNC Systems

Kirovohrad Vocational School of Communications — Associate's Degree, Radiotechnics & Electromechanical Systems
